UX **ERPUX**

Oracle Fusion Cloud

Stop Paying the VBCS Tax

Your Oracle Fusion Cloud extensions shouldn't cost $300K+ and take 6 months to build.

The real cost of building on Oracle VBCS

$ **OIC license required**
~$100K/yr for 3 message packs. Before a single line of code.

Oracle JET developers
A niche framework. Hard to hire. Hard to retain. $150-300K/yr.

3-6 months to deploy
Consulting engagements, SI partners, and endless scoping.

Year 1: What VBCS actually costs

OIC License (3 packs)	**~$100K**
SI partner / consulting	**$50-200K**
OCI infrastructure	**$10-30K**
Oracle JET developers (2 FTE)	**$150-300K**

Typical Year 1 Total	**$310K - $630K**

What if you could skip all of that?

✓ No OIC license required

✓ No developers needed

✓ Deploy in days, not months

✓ Unlimited users included

✓ Infrastructure fully managed

✓ Oracle security inherited automatically

UX ERPUX

How ERPUX works

01 **Tell us what you need**
Which Oracle module. Which process. What's broken.

02 **We build it**
Working POC on your Oracle test instance. Your data, your security.

03 **Go live**
Embed inside Oracle Fusion via Page Integrator. Training included.

04 **We run it**
Hosting, updates, compatibility, support. All included.

VBCS vs ERPUX

Oracle VBCS

✗ OIC license ~$100K/yr

✗ JavaScript devs required

✗ Months to deploy

✗ 5 GB storage limit

✗ Per-user licensing

✗ Customer maintains

✗ 1.1% market adoption

ERPUX

✓ No OIC needed

✓ Fully managed

✓ Deploy in days

✓ Unlimited storage

✓ Unlimited users

✓ We build & maintain

✓ Built-in AI

UX ERPUX

"

We replaced a 6-month VBCS project with an ERPUX app deployed in 2 weeks. Same Oracle data, same security, fraction of the cost.
