

How We Work

We Build Oracle Fusion Apps. You Subscribe.

A different model for Oracle Fusion Cloud extensions. No consultants. No licenses. No infrastructure to manage.

The old way to extend Oracle Fusion Cloud

Every Oracle extension project starts the same way. And it's exhausting.

✗ Hire an SI consulting firm — 3-month scoping phase

✗ Buy additional Oracle licenses (OIC, VBCS, OCI)

✗ Recruit developers for a niche tech stack

✗ Manage cloud infrastructure, patching, uptime

✗ 6-12 months to go live

✗ Then you own it forever — bugs, updates, compatibility

The ERPUX way

Tell us the problem. We build the app. You subscribe.

- ✓ Tell us which Oracle process is broken
- ✓ We build a working POC on your test instance
- ✓ You evaluate with your own data and security
- ✓ Go live in days, not months
- ✓ We handle everything — hosting, updates, support
- ✓ Flat annual subscription. Unlimited users.

4 steps. That's it.

01

Tell us the problem

Which Oracle module. Which process. What's not working. We'll scope it in a 30-minute call.

02

We build a POC

A working app on your Oracle test instance. Your data, your security, your users. Typically 2-4 weeks.

03

Go live

Embed inside Oracle Fusion via Page Integrator or standalone access. Training and onboarding included.

04

We run it

Hosting, Oracle quarterly compatibility, new features, support. All included in the subscription.

Everything included

One subscription covers it all. No hidden costs.

Hosting

Fully managed cloud infrastructure. 99.9% uptime SLA.

Updates

Continuous improvements. New features shipped regularly.

Unlimited users

No per-seat licensing. Everyone who needs access gets it.

Support

Direct access to the team that built it. No ticket queues.

Oracle compatibility

Tested with every Oracle quarterly update. Always compatible.

Built-in AI

Intelligent assistance where it makes sense. No extra charge.

Per-application pricing

Choose the tier that fits. Scale when you're ready.

ESSENTIAL

Tier 1

Single-purpose monitoring and reporting apps

- ✓ Real-time dashboards
- ✓ Oracle data read access
- ✓ Alerting and notifications
- ✓ Unlimited users

CORE

Tier 2

Full workflow apps with read and write Oracle access

- ✓ Everything in Tier 1
- ✓ Oracle write-back
- ✓ ESS job management
- ✓ AI-assisted workflows

ADVANCED

Tier 3

Complex multi-module apps with orchestration

- ✓ Everything in Tier 2
- ✓ Cross-module workflows
- ✓ Custom integrations
- ✓ Dedicated support

Your POC investment is **never lost** — it's credited against Year 1.

We charge a one-time fee to build your proof of concept on your Oracle test instance. If you subscribe, the full POC cost is deducted from your first-year subscription.

Risk-free evaluation

Test with your real data and users

POC cost credited

Full amount off Year 1 subscription

Fast turnaround

Working POC in 2-4 weeks

We build it. You subscribe.

Tell us what Oracle Fusion Cloud problem you're solving. We'll respond within 24 hours with a plan.
